PATENT PENDING

## **The Handozer 3.5 Multi Groomer** **Lawn & Garden Tractor Implement**

The new **Handozer Multi Groomer** drag by **Handozer Distributing** is designed to grade soil, sand, gravel and more. The 42 inch wide **Handozer D3.5-MG** is user friendly and is great for grooming gravel driveways, home horse arenas, round pins, gardens and more. All with your lawn & garden tractor or small ATV!

The new caster system makes the **Handozer D3.5-MG** easy to transport and handle. Attach our pull rope to the caster lever and operate the **D3.5 Dozer** remotely from the seat of your mower! The front spikes are adjustable with U-bolts and the new adjustable turnbuckle hitch! This combination gives you total control of the spike depth. The new pivoting back rake is reversible and has three positions for raking or grading soil. If more weight is what you need simply place a standard block from your local Home & Garden Store in the brackets provided in frame. The **Handozer D3.5-MG** works excellent in wet or dry conditions.

The design of **Handozer D3.5-MG** side rails and tow hitch maintain the depth control you desire while providing an aggressive cutting action for the toughest of surfaces. The **D3.5-MG** is also a leveling implement for your gravel and garden areas. The **MG** is two pieces of garden tractor or ATV implements for the price of one!

*New Pivoting Rake for  
Grooming and Grading*

### **Effortless Operation**

The new caster assembly & rope system enables the Handozer to be driven from place to place & grade gravel & soil like a 3-Point tractor!

- Towed with garden tractors or small ATV's
- Durable high-grade steel construction
- 5/8" x 8" Harrow spikes and tow hitch easily adjust to the depth you desire
- Easy to use for men and women
- Works great in a variety of wet or dry conditions
- Tow-behind models include flat proof wheels for convenient transport
- New reversible & pivoting grading rake
